

ZCL Signature Guardian Doors®

Our door sets have been installed in hospitals, offices, government establishments and proved the test of time and carry a ten year manufacturers' warranty.

If you require further details or information please do not hesitate in contacting us.

The Signature Range are encapsulated doors offering a long lasting, easy clean, chemical and moisture resistant finish. Door sizes can be manufactured to individual requirements and designs. The Signature range is an encapsulated door with factory thermoformed edges. Finishes include standard colour Acrovyn range or 2mm thick PVC Satina or Spectrum range Alternatively these can be face fixed with exposed hardwood lipping to all edges and, when fire rated, combined fire and smoke seals in both edges and head. Frames can be softwood, factory finished hardwood or encased with above sheets. Various vision panel and privacy panel designs are available in clear or opaque as required, see separate sheet on door types. Doors supplied with stainless steel hinges, other ironmongery available upon request.

Available in Standard colour Acrovyn and Satina range (Satin) or Spectrum range (Gloss). Door sets can be NFR, FD30 and 60FD. A versatile high impact material self-extinguishing with Class 1 fire rating to both BS479 part 6 and 7 and achieves Class 0 Building Regulation rating when bonded to a non-combustible substrate. Guardian Signature range has outstanding properties which afford impact protection.

Throughout our business, we work to the requirements of recognised Chain of Custody systems, which are a certified way of making sure that a product has come from a defined and sustainable source. The majority of our products come from companies that are certified to ensure that they have been legally harvested from sustainably managed forests. The product sources are appraised using detailed due diligence procedures to ensure that they meet the criteria for legality set by the European Union Timber Regulation (EUTR). See separate Timber Supply Policy leaflet. Adhering to strict quality control procedures to ensure our doors are of the highest standard and meet RPA and NHS HTM58 guidelines

Cleaning

Using a soft cloth and diluted mild detergent is normally all that is required. Do not clean using any solution with a temperature exceeding 60°C. Do not use any abrasive cleaners, pads or wire wool as this will damage the surface.

Chemical Resistance

Resistant to virtually all commonly used chemicals,
