## Guardian Hygienic Cladding

Guardian Hygienic Cladding is the solution for dependable, hygienic, simple and attractive wall and ceiling cladding that can be applied to new or old surfaces for a sealed clean room environment. It can be applied to doors and frames to give a smooth hygienic finish.

Whatever the application or legislative requirement, the versatile choice of material sizes, colours, profiles and fixing accessories have been tailored specifically to ensure that Guardian cladding systems will produce a quick, durable and superior finish.

- High quality, time and money saving innovations
- Colour consistency
- Food safety approved
- Full range of matching profiles
- Specialist installation accessories including adhesive, sealant and rivets
- Flexible edge profiles available providing assistance with achieving a watertight installation
- Acrylic sealant to joints or PVC cover strips.
- Thermoformed internal corners and returns
- Sheet can be used to encapsulate Guardian doors and frames.

**Material choice: U-PVC Sheet**

Typical applications include: hospitals, kitchens, commercial food preparation environments and showers. A versatile high impact material with Class 1 fire rating to both BS479 part 6 and 7 and achieves Class O Building Regulation rating when bonded to a non-combustible substrate. Guardian sheets have outstanding hygiene properties and should be fixed using a choice of fixing adhesives and sealants.

Available in 2mm thick a Satina range (satin finish) and Spectrum range (Gloss finish)

- Range of sheet sizes and thicknesses
- Large range of colour matching profiles
- A choice of adhesives
- FDA approved for food contact
- Very high chemical resistance
- Good impact strength to 0°C
- Excellent rigidity
- Meets building, food and hygiene regulations
